LED BATTERY OPERATED ROTATING BEACON
**Magnet Mount**
- LED Rotating Beacon
- 25 lb. pull magnet
- Battery operated (Takes 4 AA Batteries)
- Adjustable rotation speed
- 5” diameter x 4½” high
- Use on farm equipment, warehouse equipment, cars or trucks

LED BATTERY OPERATED FLASHING / ROTATING BEACON
**Magnet Mount**
- Can flash or rotate
- Strong magnetic mount
- Battery operated (Takes 4 AA Batteries)
- IP65 waterproof rating
- Durable polycarbonate lens
- Flashing: 180/minute
- Rotating: 85/minute

3½” Amber LED Beacon
**Permanent/Magnet Mount**
- Can flash or rotate
- Can be permanent or magnet mount
- Battery operated (Takes 4 AA Batteries)
- IP65 waterproof rating
- Durable polycarbonate lens
- Flashing: 180/minute
- Rotating: 85/minute

27-Watt LED Class I Rotating Beacon

PRODUCT WARRANTY

*Product must be received & inspected prior to credit issuance.

Returns
Any and All returns must be authorized by Custer Products. Limited Warranty Items will be tested, repaired and returned whenever possible. If the product is deemed defective and within warranty, Custer Products will have the option to replace or credit the lowest product selling price within the warranty period.

Restocking Charge
A 15% restocking charge will be assessed to any non – defective product return.

Limited Warranty
Custer Products Ltd. warrants its products to be free from defects in material and workmanship under normal use and services as set forth in this Limited Warranty.

General 1, 2 and 3 Year Limited Warranty
Custer warrants to the original purchaser only each new product made by Custer which proves to be defective in material or workmanship within the limited warranty period from the date of shipment. Custer will, at Custer’s option, repair or replace without charge upon return to Custer of the defective product, provided any defect in the product is brought to the attention of Custer within the terms of this limited warranty period. The above limited warranty does not apply, and no warranty, either express or implied shall be applicable (a) to damage resulting from accident, alteration, misuse or abuse; (b) if the product is not installed, operated and maintained according to procedures recommended by Custer; or (c) if the serial number, date code, or other identifying marks affixed to the product by Custer are removed, obliterated or defaced. In no case shall the limited warranty be extended to defects in materials components (including but not limited to bulbs), or services furnished by third parties, nor to the installation of the product performed by third parties. If any repairs are made to any Custer’s products, components, or if any parts thereof are replaced or altered, or any attachments are added to any Custer’s products or components during the warranty period by anyone other than an authorized Custer distributor in accordance with service manuals, parts, accessories, or attachments, authorized by Custer for use in Custer’s products, the purchaser shall pay for such repairs, parts, attachments and alterations without recourse against Custer, and Custer shall be relieved of responsibility for fulfillment of the limited warranty with respect to such affected products or components.
**Amperage** – the strength of a current of electricity expressed in amperes; Amperage can be calculated by using formula: \( \text{Watts} \div \text{Volts} = \text{Amps} \).

**CREE** – market leading lighting manufacturer; known for longevity of 100,000 hour lifetime, brighter LEDs, and less amperage draw.

**COB (Chips on Board)** – Multi-LED chips are packed together as one lighting module; significantly brighter than standard LED lights; saves energy and has a very long lifespan.

**Diode** – an electronic device that restricts current flow chiefly to one direction.

**Flange** – A part used to mount lights to surfaces.

**Flood** – wide pattern of light; light distribution is done by the lens, used best for short distance.

**Incandescent** – emitting light as a result of the filament being heated.

**IP Rating** – used to define levels of sealing effectiveness of electrical enclosures intrusion from foreign bodies (dust, dirt) and moisture.

**Joule** – the equivalent of one watt of power radiated or dissipated for one second.

**LED** – Light Emitting Diode.

**Lumens** – the measure of the total “amount” of visible light emitted by a source; there are about 80 lumens per watt.

**PC Rated** – means that the light is viewable from a 90 degree angle.

**Polycarbonate** – tough transparent thermoplastics characterized by high impact strength; up to 10 times more impact-resistant than standard plastic or glass.

**Polyethylene** – lightweight thermoplastic that is resistant to chemicals and moisture.

**Spot** – narrow intense beam on a small area.

**Watts** – the measure of electrical power.
